

IFRS 9

Rational & Objectives

Rabih Nehme,
Head of Risk

Banking Control Commission of Lebanon, BCCL

Cyclicality: issues

- To what extent is Basel II pro-cyclical?
- Need to find balance between risk-sensitivity & cyclicality
- Banks' business models are inherently cyclical
 - Risk appetite varies with changing economic conditions
- Other sources of cyclicality
 - Accounting rules
 - Provisioning practices

Basel III & Procyclicality

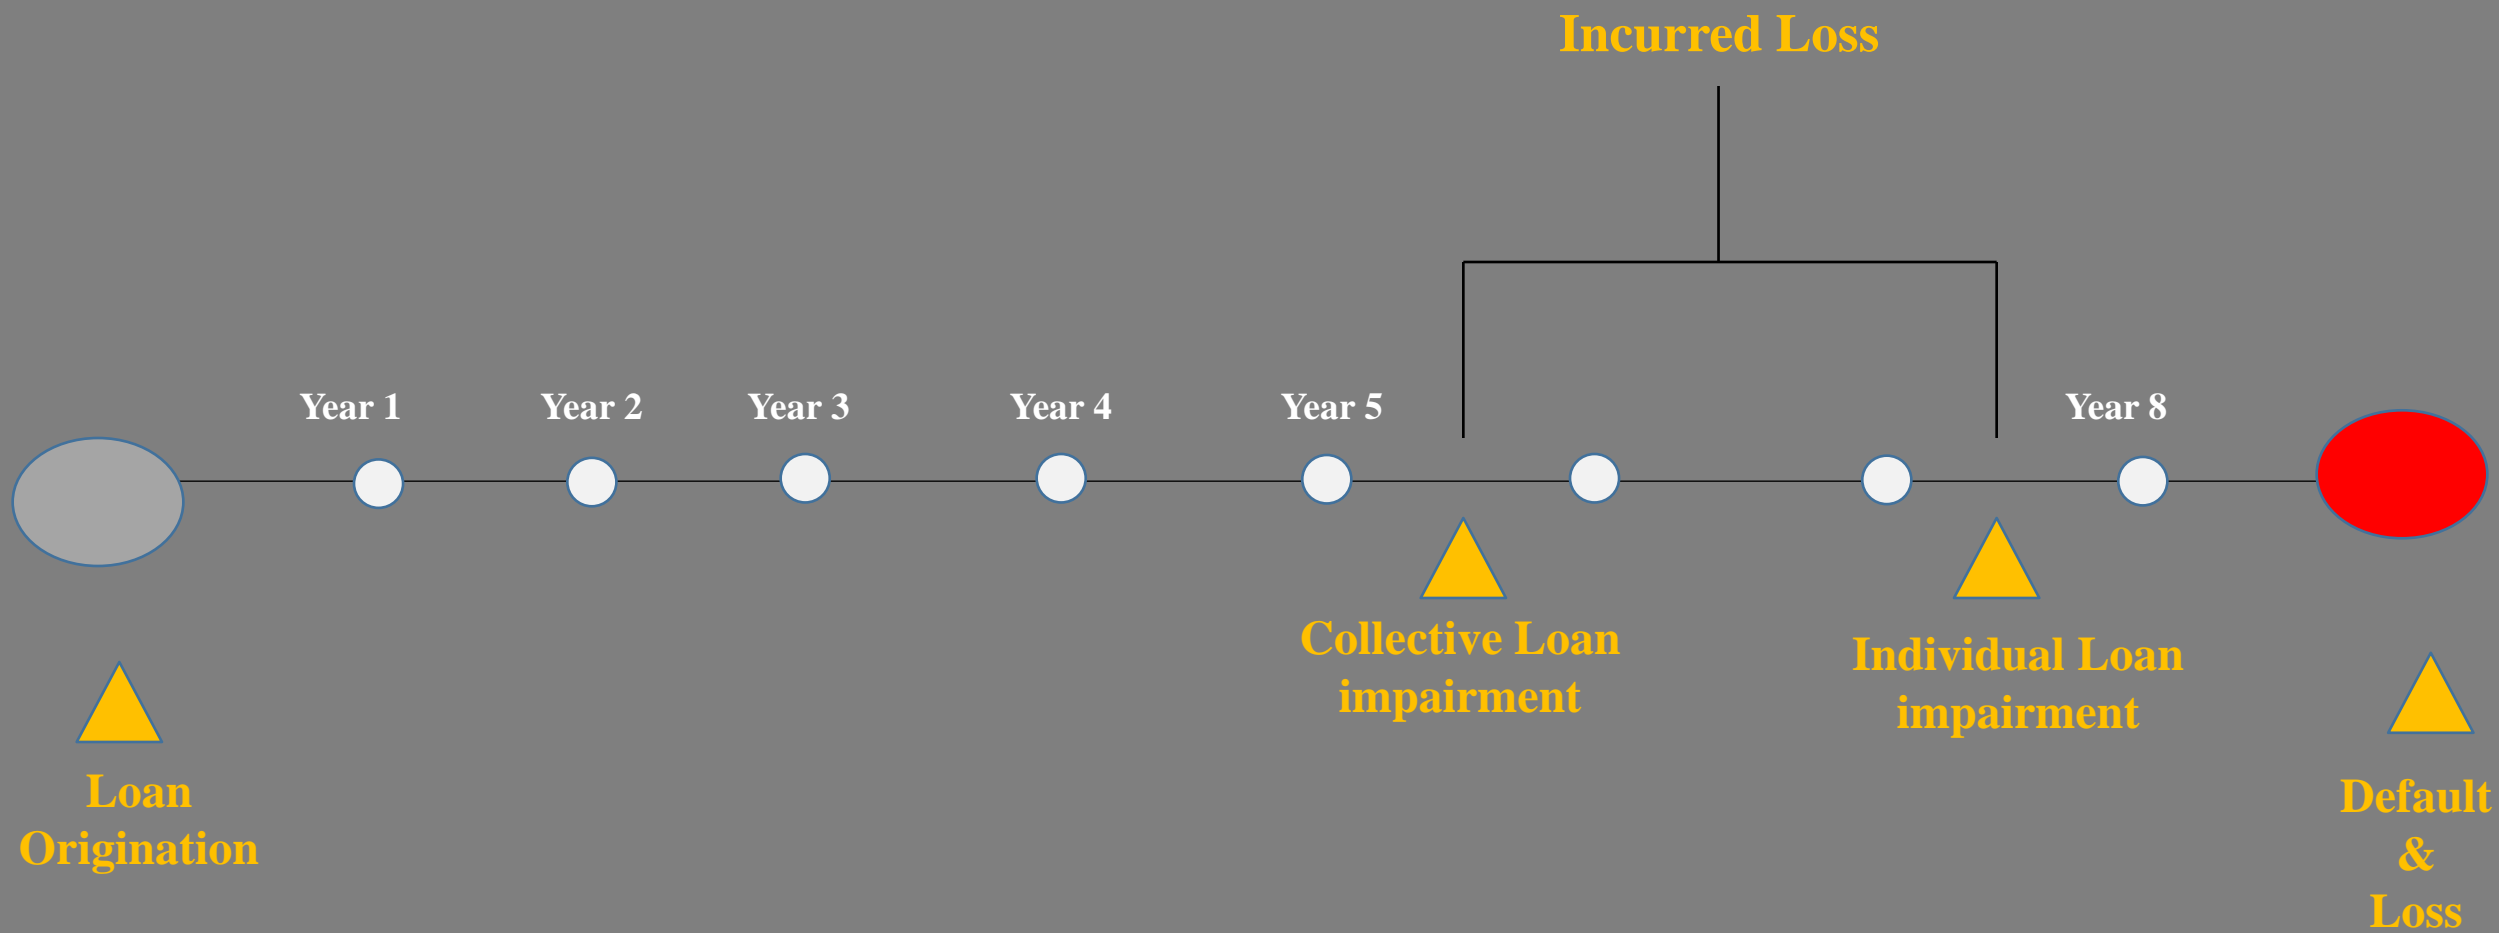

- Range of measures to:
 - address Procyclicality &
 - increase resilience in good times
- Four key objectives:
 1. Dampen cyclicity of the minimum capital requirement
 2. Conserve capital to build buffers at individual banks
 3. Protect banks from periods of excess credit growth
 - 4. Promote more forward-looking provisions**

Types of Provisions

- 1) Specific Provisions
- 2) General Provisions
- 3) Country Risk Provisions

Incurred Loss Model provisioning

- Objective evidence of impairment
- Loans to be collectively reviewed for impairment
- Increase the volatility of banks' results.

	2004	2005	2006	2007	2008	2009	2010	2011
Incurred Loss Model	100	120	140	130	100	70	30	-20
Forward Looking Model	80	90	90	90	100	100	100	70
General Provisions	20	30	50	40	-	-	-	-
Stock of Provisions	20	50	100	140	140	110	70	-

Impact on Capital

- if losses not recognized & provisions not allocated accordingly
- it could translate into a series of adverse implications:
 - unrecognized losses
 - inadequate provisions
 - overstated loan values
 - inflated income
 - overstated capital
 - threat of insolvency

Impact on Capital

- **Basel I**: only general provisions are counted towards capital.
- **Basel II**, SA: only general provisions,
- **Basel II**, IA: part of Specific provisions also
compared to the EL amount calculated under the IRB (1-year period)

In some developed jurisdictions

all provisions including general provisions, specific provisions as well as country risk provisions, can be counted towards capital.

Modelling Credit Losses

Retail Loan Portfolio

- Large number of small losses
- Few occasions with severe losses

Expected Losses :

- The amount a bank can expect to lose on average, based upon its historical loss data.

Unexpected Losses :

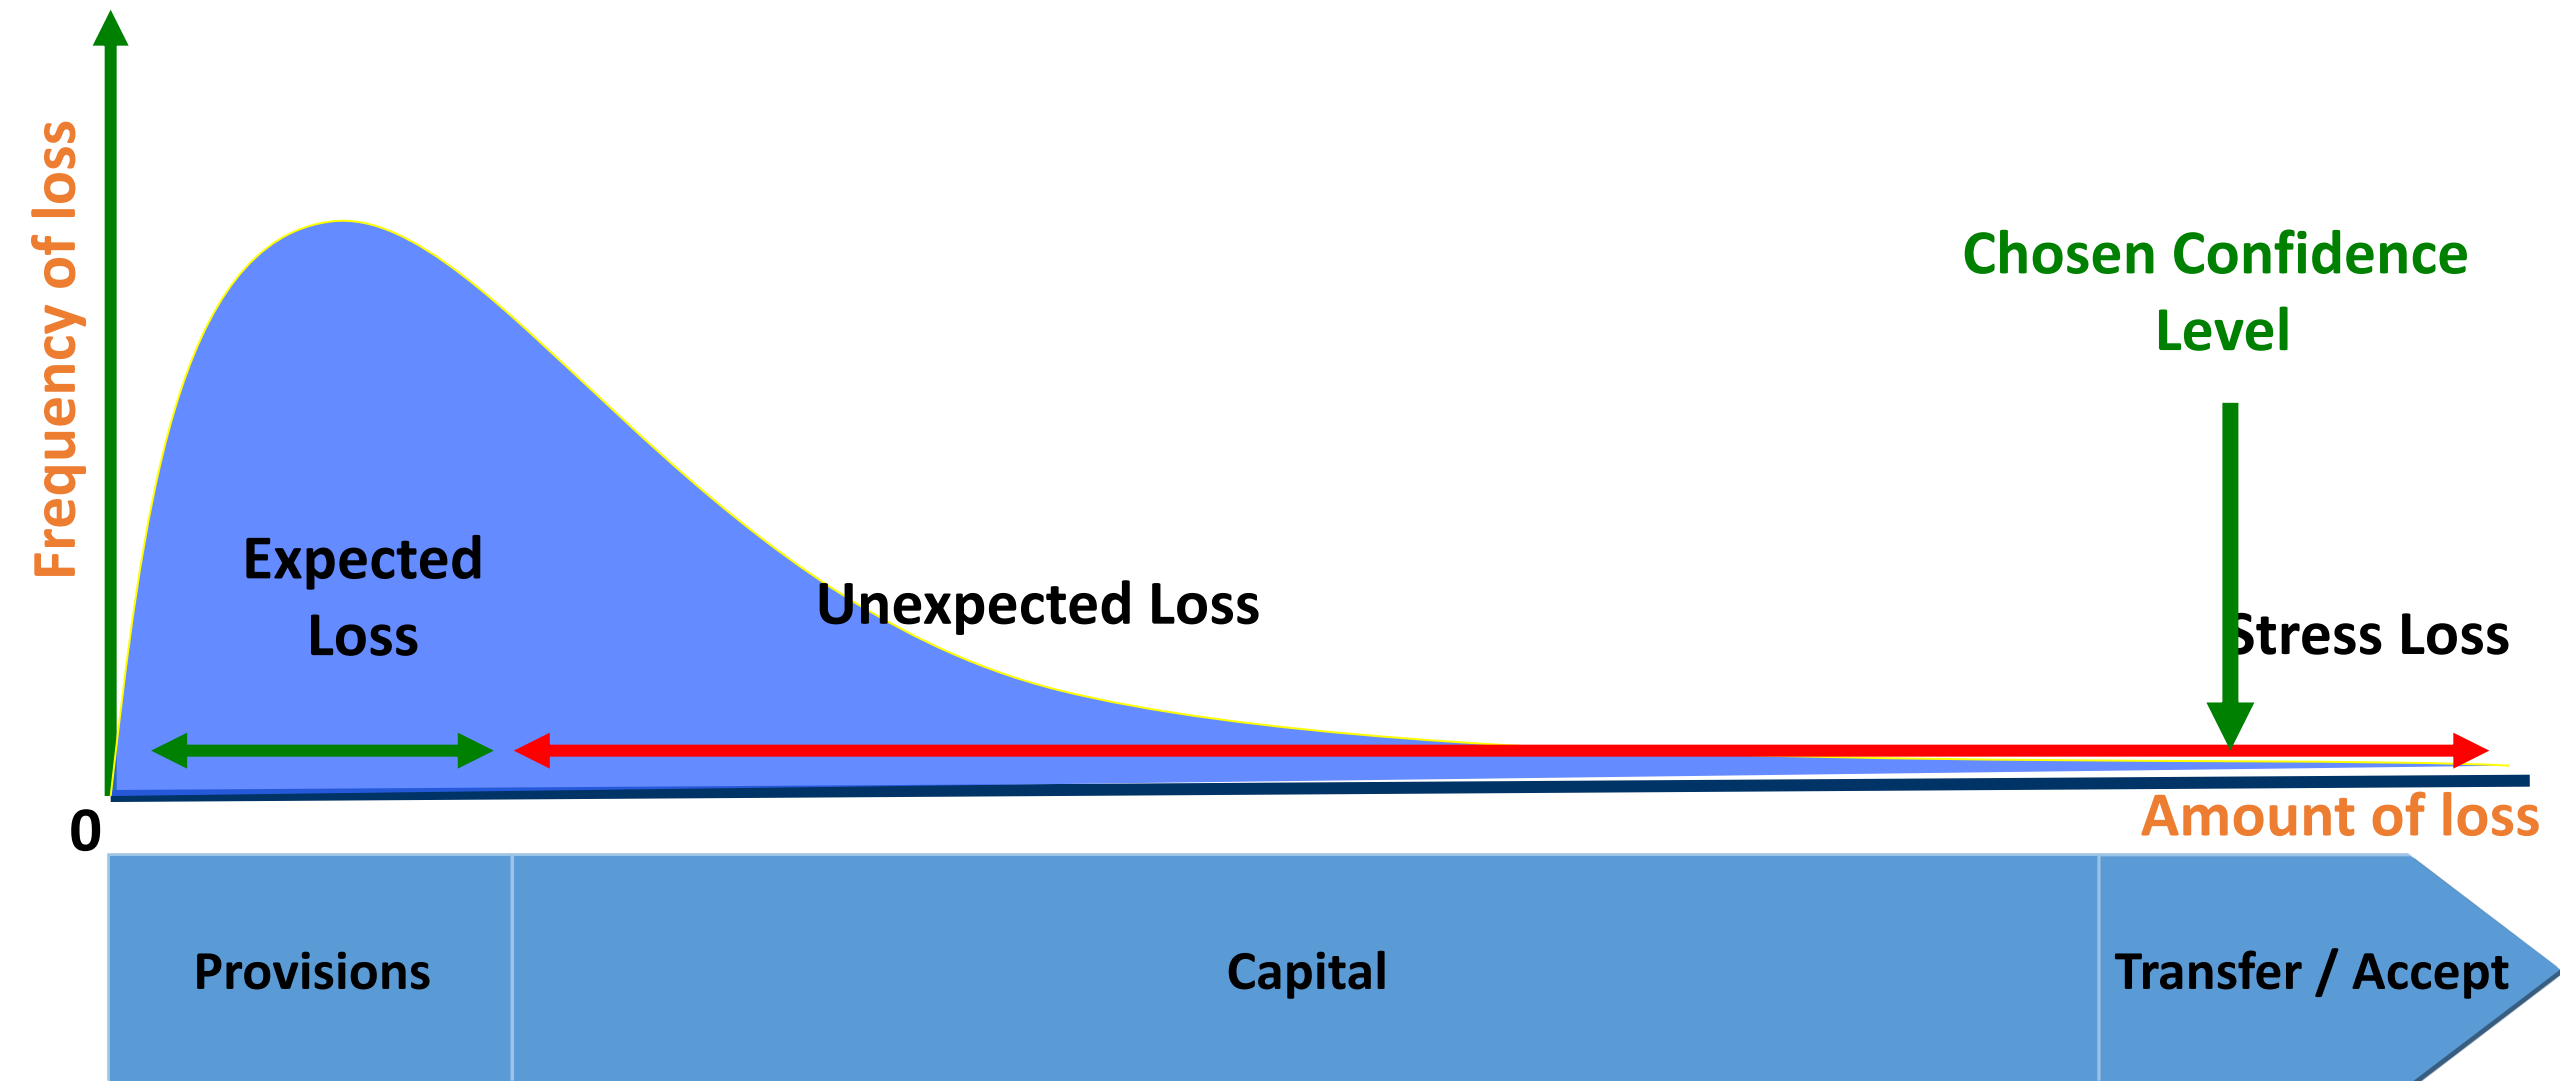

the actual loss that exceeds the expected loss the bank has anticipated over a period

Stress Losses :

- Those exceeding the chosen level of confidence
- Occur very rarely, but their impact is considerable

Thank You
